🐙 github.com/rameshbanala 🌐 Portfolio 📍 Adoni, Kurnool, Andhra Pradesh

Professional Summary

Full-Stack MERN Developer with **10+ months of hands-on internship experience** building production-grade web and mobile applications. Proficient in **MongoDB, Express.js, React.js, and Node.js**, with additional expertise in PostgreSQL, React Native, and REST API design. Delivered multiple end-to-end features in an agile team environment — including real-time systems, role-based authentication, and third-party payment integrations. Committed to writing clean, scalable, and maintainable code.

Work Experience

ScaleOrange Technologies	Hyderabad, India (Hybrid)	May 2025 – Present
<i>Software Developer Intern — Full-Stack & Mobile (React Native / Node.js)</i>		
- Architected and shipped a cross-platform React Native app (ServeNest) connecting 5,000+ users with hyperlocal service providers via integrated maps, WhatsApp deep-links, and direct calls. - Built role-based admin dashboards (React.js + Node.js + PostgreSQL) with real-time analytics, reducing manual reporting effort by ~60%. - Designed and implemented RESTful APIs (Express.js) for community modules — events, jobs, marketplace, and donations — handling concurrent user requests with JWT-secured endpoints. - Integrated Razorpay payment gateway enabling subscription-based monetisation; implemented webhook handlers for reliable payment lifecycle management. - Built and deployed the Estate360 platform (PERN stack + React Native monorepo) — a full-scale real estate listing and management application with property search, agent dashboards, and geo-filter capabilities. - Managed Linux VMs on cloud infrastructure, configured Docker containers for isolated service deployments, and set up Nginx reverse proxy with custom domain and SSL termination. - Implemented real-time push notifications using Firebase Cloud Messaging, improving user engagement metrics. - Optimised PostgreSQL queries with JSONB indexing and query plans, reducing average API response time by ~40%.		

Technical Skills

Core Stack	MongoDB, Express.js, React.js, Node.js (MERN)
Languages	JavaScript (ES6+), TypeScript, Python, Java, C++, C
Frontend	React.js, React Native, Redux, Context API, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, REST API Design, JWT Auth, Middleware Architecture
Databases	MongoDB, PostgreSQL (JSONB, Indexing), MySQL
DevOps / Tools	Git, GitHub, Docker, Nginx, Linux, Vercel, Netlify, Render, Postman
Integrations	Firebase (FCM, Auth), Razorpay, Google Maps API, GitHub Actions

Projects

Estate360 — Real Estate Platform	<i>PERN Stack + React Native Monorepo</i>	GitHub 
- Built a full-scale real estate platform with property listing, search filters, and agent dashboards using a PERN + React Native monorepo architecture — sharing business logic across web and mobile. - Implemented geo-based property filtering and interactive map views, reducing search friction for end users. - Designed a multi-role system (buyer, seller, agent, admin) with scoped access control at the API level. Tech: PostgreSQL, Express.js, React.js, Node.js, React Native, JWT, Docker		
Resume Analyzer — AI-Powered Resume Evaluation	<i>Node.js · PostgreSQL · React.js · Gemini AI</i>	Live  GitHub 

- Built a full-stack application that parses, evaluates, and scores resumes using the **Gemini AI API**, returning structured feedback and upskilling recommendations.
- Designed a **PostgreSQL schema with JSONB fields** for flexible resume data storage; implemented rating constraints and query-optimised indexes.
- **Tech:** Node.js, Express.js, PostgreSQL, React.js, Gemini API

AgroFix — Bulk Agro Order Management *React.js · Node.js · PostgreSQL* [Live](#) | [GitHub](#)

- Developed an end-to-end platform for bulk fruit and vegetable order management for institutions, with **user/admin roles, order tracking, and a responsive React UI**.
- **Tech:** React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL

FixIt — On-Demand Home Repair Services *React.js · Node.js · MySQL · JWT* [Live](#) | [GitHub](#)

- Built a two-sided marketplace connecting homeowners with skilled workers, featuring **JWT authentication, booking management, payment flow, and worker verification via file upload**.
- **Tech:** React.js, Node.js, Express.js, MySQL, JWT

Education

Rajiv Gandhi University of Knowledge Technologies, RK Valley		<i>Expected May 2026</i>
<i>B.Tech in Computer Science and Engineering</i>	CGPA: 9.04 / 10.0	
RGUKT RK Valley	<i>Pre-University Course</i>	CGPA: 9.76 / 10.0
		<i>Jan 2021 – Sep 2022</i>

Achievements & Extras

- **2nd Prize — Aadhya Hackathon 2025** at RGUKT: Built *Campusphere*, a campus social and resource platform, in a competitive 24-hour hackathon. [\[LinkedIn Post\]](#)
- Contributed to **production deployments** at ScaleOrange Technologies — managing real user traffic on live applications.
- Actively maintaining an **open-source portfolio** of full-stack projects on GitHub with documented READMEs and deployment pipelines.
