📍 Andhra Pradesh, India

Professional Summary

Full Stack Developer with production experience building an AI-powered sales automation platform end-to-end — React/Next.js interfaces, Node.js and Go backend services, Gemini-powered product features, and integrations spanning CRM, payments, and telephony. Prior experience shipping full-stack web and mobile applications with infrastructure ownership and measurable performance gains.

Work Experience

Tvara Bengaluru, India June 2026 – Present
Full Stack Developer

- Built **Gemini-powered campaign generation workflows** with structured JSON output, multi-stage orchestration (discovery, matching, drafting, approval), and validation constraints to prevent hallucinated content.
- Integrated a **second telephony provider (Z99)** alongside Twilio, implementing SIP/WebRTC-based calling and inbound/outbound webhook handling with consistent call-metadata mapping across providers.
- Implemented **IAM enforcement** on the Next.js frontend via a fetch-interceptor module, and shipped a React Native (Expo) feature to retrieve call recordings from Android devices without custom native modules.

ScaleOrange Technologies Hyderabad, India (Hybrid) May 2025 – March 2026
Software Developer Intern – Full Stack & Mobile

- Architected and shipped a **cross-platform React Native app** (ServeNest) connecting **5,000+ users** with hyperlocal service providers, with Firebase Cloud Messaging for real-time notifications.
- Built **role-based admin dashboards** (React.js, Node.js, PostgreSQL) with real-time analytics and integrated Razorpay payment subscriptions, reducing manual reporting effort by ~60%.
- Built and deployed **Estate360**, a real estate platform using a PERN + React Native monorepo, with geo-based property search and role-scoped dashboards.
- Managed **Linux VMs and Docker** deployments with an **Nginx** reverse proxy, and optimized PostgreSQL queries with **JSONB indexing**, reducing average API response time by ~40%.

Technical Skills

Languages	JavaScript, TypeScript, Go, Python, Java, SQL
Frontend	React.js, Next.js, React Native, Redux, Tailwind CSS
Backend	Node.js, Express.js, Go, REST APIs, Microservices, Webhooks, OAuth, JWT
Databases	PostgreSQL (JSONB), Redis, MongoDB, MySQL, SQLite, Firebase Firestore
AI & Integrations	Gemini, LLM Workflows, Zoho CRM, Twilio, Z99, SIP, WebRTC, Razorpay
Cloud & Tools	GCP, Docker, Nginx, Linux, Git, GitHub Actions, Vercel, Render

Projects

MyPocket – Offline-First Personal Finance App *React Native · SQLite · Firebase* [APK](#) [🔗](#)

- Built an **offline-first React Native app** for expense/income tracking with local-first storage (SQLite) and background Firebase sync.
- Implemented **bank statement import** (CSV, XLSX, PDF) with local parsing and transaction classification.

FixIt – Hyperlocal Home Repair Marketplace *Node.js · PostgreSQL · Redis* [Live](#) [🔗](#)

- Designed a **two-sided marketplace** connecting homeowners with verified providers, with a three-role system and scoped API access control.
- Built the backend with **Node.js, Express, PostgreSQL, Redis, and BullMQ** for background jobs, and **Socket.IO** for real-time booking updates.

Education

Rajiv Gandhi University of Knowledge Technologies, RK Valley *Graduated May 2026*
B.Tech in Computer Science and Engineering **CGPA: 9.04 / 10.0**

Achievements

- **2nd Prize – Aadhya Hackathon 2025, RGUKT:** Built *Campusphere*, a campus social and resource platform, in a 24-hour hackathon.
